Mohamed Riyaz Ahamed

Chennai, India | +91 89392 47622 | riyazahmedff@gmail.com
Portfolio: riyaz-dev.vercel.app | GitHub: github.com/riyaz-ahamed-07 | LinkedIn: linkedin.com/in/riyaz

Education

Saveetha Engineering College — Chennai, India
B.Tech in Artificial Intelligence and Machine Learning | CGPA: 8.93/10 — *Expected May 2028*

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, SQL
Frameworks: React, React Native, Node.js, Express.js, FastAPI, Spring Boot
Databases & Cloud: PostgreSQL, MySQL, Google Cloud Platform, Supabase, Vercel
AI/ML: LLM Integration, Prompt Engineering, RAG, Semantic Search, TensorFlow, Pandas
Other: Data Structures & Algorithms, OOP, REST APIs, Git/GitHub, Agile, Unit Testing

Experience

Software Engineer Intern — Mar 2026 – Present
Cradle Communities Inc. – Gatherly — *Remote*

- Delivered 40+ merged PRs (10k+ lines) across Gatherly's React Native app, Node.js backend, and web platform.
- Implemented listing comparison backend logic with lease-based rent fallback and filtering for accurate results.
- Translated Figma designs into reusable production UI components deployed to a live platform used across Canada.

Web Development Intern — Jul 2025 – Aug 2025
Altruisty Innovation Pvt Ltd – Portfolia — *Chennai, Tamil Nadu*

- Built Portfolia, an AI-powered portfolio builder that imports repositories through GitHub API integrations.
- Architected FastAPI and PostgreSQL services with SQLAlchemy to expose secure APIs for repository ingestion.
- Developed a React and TypeScript dual-pane editor to streamline AI output review and refinement workflows.

Projects

Voltify | *React, Node.js, PostgreSQL, LLMs* — Apr 2026 – Present

- Won 1st place at Energize 2026 and Byte Blaze National Hackathons; received a 2L equity offer from judges.
- Built an AI-powered energy platform with appliance-level bill estimation, forecasting, anomaly detection engine.
- Integrated LLM-based bill OCR parsing with rule-based fallback and validated reliability using end-to-end testing.

Offline Candidate Ranker | *Python, Sentence Transformers, PyTorch* — Jun 2026 – Jul 2026

- Built an offline AI ranking system for 100,000+ candidate profiles using semantic search and scoring pipelines.
- Engineered six-stage pipeline combining transformer embeddings, behavior scoring, anomaly detection engine.
- Ran fully offline on CPU, completing inference in 45 seconds while using under 100MB RAM reproducibly.

Agentic Sales Intake Agent | *Spring Boot, React, PostgreSQL, RAG* — Mar 2026 – Apr 2026

- Built a full-stack AI sales qualification platform using RAG to retrieve case studies for qualified prospects.
- Developed scalable Spring Boot REST APIs for conversational flow orchestration and lead qualification workflows.
- Integrated LLMs, semantic search, and intent classification to power real-time conversational responses in React.

Certifications & Recognition

Oracle Certified Professional: Java SE 21 Developer (OCP) — Dec 2025
Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — Oct 2025
1st Place – ENERGIZE 2026 Hackathon — Apr 2026
1st Place – Byte Blaze National Level Hackathon — Jun 2026
